# ⬚ Next Template

## ⬚ Installation and Launch

### 1. Installing `PNPM` ⬚

Before starting development, install `PNPM`:

```
npm install -g pnpm
```

### 2. Installing Dependencies ⚙

With `PNPM`:

```
pnpm install
```

Alternatively, with `NPM`:

```
npm install
```

### 3. Running in Development Mode ⬚

With `PNPM`:

```
pnpm dev
```

Alternatively, with `NPM`:

```
npm run dev
```

### 4. Build for Production ⬚

With `PNPM`:

```
pnpm build
```

Alternatively, with `NPM`:

```
npm run build
```

### 5. Start Production Server ⬚

> ⚠ Requires a successful `build` step beforehand.

With `PNPM`:

```
pnpm start
```

Alternatively, with `NPM`:

```
npm run start
```

### 6. Linting and Formatting ⬚

**Check code with ESLint:**

With `PNPM`:

```
pnpm lint
```

Alternatively, with `NPM`:

```
npm run lint
```

### Fix linting issues automatically:

With `PNPM`:

```
pnpm lint:fix
```

Alternatively, with `NPM`:

```
npm run lint:fix
```

### Format code with Prettier:

With `PNPM`:

```
pnpm format
```

Alternatively, with `NPM`:

```
npm run format
```

## 7. Cleaning the Project 🧹

Removes `node_modules`, `dist`, and lock files:

With `PNPM`:

```
pnpm clean
```

Alternatively, with `NPM`:

```
npm run clean
```
